- > Dashboard and Scorecard Development
- > Data Extraction
- > Mentoring

Training to Meet the Needs of the Enterprise

DSCallards is the number one reseller of SAP Crystal Reports in the UK and partner of SAP Business Objects. We have been working with SAP Crystal Reports for over fifteen years and deliver a wide range of training courses at competitive rates. Our courses can be tailored to suit the needs of the enterprise in terms of duration, timing and location.

Report Design: Introduction (Two Days)

The first in our series of SAP Crystal Reports training is Report Design, which is a two-day instructor led course that is designed to provide delegates with the skills to enable them to plan and create reports. Topics covered include:

- > Planning and creating a report
- > Organising data on a report
- > Formatting a report
- > Creating basic formulas
- > Representing data visually
- > Distributing a report

Report Design: Advanced (Two Days)

This two-day course is designed to build on the topics learned in the Introductory Course to increase report design skills and discover the reporting power of SAP Crystal Reports. Along with hands-on practice, the course covers the Crystal repository, grouping options, formulas such as variables and functions and parameters.

- > Grouping options
- > Formulas
- > Sections
- > Parameters
- > Sub-reports

“ DSCallards did extremely well in tailoring the course to meet our exact needs ”

The Cooperative Group

SAP Crystal Dashboard Design Training (Two Days)

The delegate will learn all facets of effective dashboard creation from SAP Crystal Dashboard Design architecture and basic components, to complex multi-dimensional dashboards. In addition, the course contains a Microsoft Excel module to provide the delegate with the tools to maximize their usage of the features and functionality available within the SAP Crystal Dashboard Design product. The course takes the delegate through three distinct stages:

- > Getting to know SAP Crystal Dashboard Design and the basic architecture
- > Adding components and changing their behaviour
- > Making components work together and building professional presentations

SAP Crystal Reports Dashboard Design Package (Three Days)

This three-day course is designed for Business Intelligence (BI) Reporting developers that are new to SAP Crystal Reports 2008 and SAP Crystal Dashboard Design. The course is separated into three parts:

- > Building reports using SAP Crystal Reports
- > Building BI dashboards using SAP Crystal Dashboard Design
- > Integrating a dashboard into a SAP Crystal Report

Other courses include:

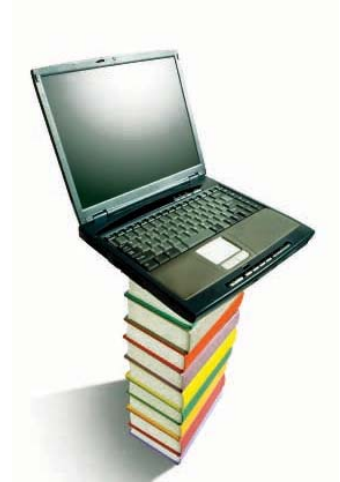

- > SAP Business Objects Universe Design
- > Web Intelligence
- > Crystal Reports Server Administrator Training
- > SAP BusinessObjects Edge Administrator Training

Specialist Training and Mentoring

As a step on from formal training courses and consulting days, DSCallards offer Mentoring services. These one-to-one sessions focus on key areas and provide a more flexible approach for advanced users.

We also offer Kick-start sessions which provide hand-held assistance for you to move from the classroom to an actual project.

Whatever your requirement, DSCallards will work with you to identify your training requirements and deliver the skills required to take your business forward into the future.
